Cattleya

Do well in East or West facing windows; spring/summer/fall the mid-day sun is too strong.

Can go outside into dappled shade late May thru September.

Temp : 55-85˚F (12-30˚C)

Water : Should barely dry out, then DRENCH again.

Fertilizer: 1/3 of prescribed dose every 2-3 weeks.

Best grown in bark/charcoal/perlite mix:

Fine size for smaller plants

Coarse size for larger plants
