Phragmipedium

Need higher light (= Cattleya), and a lot of water (most should stand permanently in a tray with 1”-1.1/2” fresh water, excepting only *caudatum*, *longifolium* & *sargentianum*).

Can go outside into full dappled shade late May thru September.

Temp : 55-85˚F (12-30˚C)

Water : Should never go bone dry, DRENCH when barely moist.

Fertilizer: 1/3 of prescribed dose every 2-3 weeks.

Plastic pots are recommended. Plants should be repotted annually!

Both sphagnum/bark mix (4:1), and the dedicated Paph bark mix can be used (*Paph mix differs from Cattleya mix!*).
