*Photos are representative (seed grown plants can vary a great deal).*

S P E C I E S & H Y B R I D S		<b>X.01 <i>Ansellia africana</i></b> Seed grown plants, AFRI Orchids breeding. I do not have photos of parents used, so I can't predict likely colors. Plants are NBS (2 bloomed in 2025) in 3" pots. Photos show first 3 plants I bloomed from previous shipment	<b>\$50.00</b>
		<b>X.02 <i>Chysis bractescens</i></b> Seed grown. Creamy white flowers, some have little color towards the tip of petals (usually yellow). Chysis blooms from young new growths. Reduce watering in winter months, but do not let them go bone dry. Plants are in a 3" net pot, one year from BS	<b>\$36.00</b>
		<b>X.03 <i>Coelogyne tommyi</i> 'Little Tommy' CHM/AOS</b> <i>This is an original division of this plant.</i> Easy to grow & bloom, intermediate temperature & light, should never go bone dry. BS plant in hanging 5" net pot	<b>\$60.00</b>
		<b>D.04 <i>Coelogyne</i> Unchained Melody</b> ( <i>cristata</i> x <i>flaccida</i> ), probably a meristem. I purchased a rescue plant, and made a number of NBS divisions	<b>\$25.00</b>
		<b>D.05 <i>Pptm.</i> La Jolla Delight 'Hilo Orchid Farm' AM/AOS</b> ( <i>Promenaea stapelioides</i> x <i>Zyg. Kiwi Dusk</i> ), a new miniature Zygopetalum with large flowers, meristem. These are BS plants in 2.1/4" pots. Somewhat fragrant.	<b>\$42.00</b>
