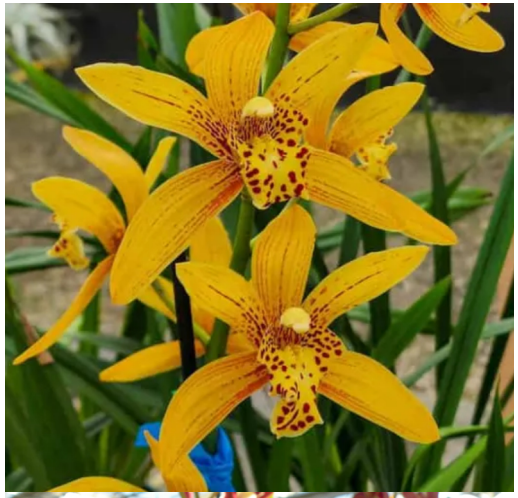
Cymbidium



Need high light (full sun). Should go outside after last frost, bring in when first frost is forecast.

Temp : 35-85˚F (2-30˚C)

Water : Consistently moist, should never dry out.

Fertilizer: Full strength prescribed, plus NutriCote in the spring.

Can be grown in:

- ➔ **Sphagnum/Bark (4:1)**
- ➔ **Coconut coir/Bark mix**
- ➔ **Light terrestrial mix (see web site)**

While outside in full sun, water heavily and fertilize every 2-3 weeks.
