

Most plants are seed grown (reference number starts with an **X**). While we have a target objective for each cross, genetics can be tricky, and **results may vary**.

Offsets (reference number starts with an **#**) are original divisions, so we can provide exact photos of the flowers it will produce.

|       |  |   |   |              |   |  |            |      |      |  |                 |  |      |  |                |  |      |  |
| #LZ.. |    |   |   |              | 'Rescue' plants from a grower no longer capable of taking care of his collection. These standard Clivias were bred by Al Manda, and originally used in the Frick Collection atrium in NYC. Flowers have not been individually evaluated (except LZ10); I did notice a few random multi-tepal flowers. |  |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   |              |   |  |            |      |      |  | Single stem NBS |  | \$30 |  | Single stem BS |  | \$40 |  |
|       |  |   |   |              |   |  |            |      |      |  |                 |  |      |  |                |  |      |  |
| #LZ10 |   |   |   |              | LZ10 is one of the rescue plants. It is showing significant green in the throat (does not show well in photos taken with my phone)  |  |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   |              |   |  |            |      |      |  | Single stem NBS |  | \$35 |  | Single stem BS |  | \$48 |  |
|       |  |   |   |              |   |  |            |      |      |  |                 |  |      |  |                |  |      |  |
| X025  | FO #008  |   | Kyle's 'Green'  |              | #008 is a good yellow with a tinge of peach. Flowers are 9 cm in diameter, and my mature plant can bloom twice a year.  |  |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |   |   |  |              |   |  |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   |              |   |  |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   |              |   |  |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   |              |   |  |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   | 7 - 9 leaf   |   | \$60   |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   | 10 - 12 leaf |   | \$75   |            |      |      |  |                 |  |      |  |                |  |      |  |
|       |  |   |   | 13+ leaf     |   | \$90   |            |      |      |  |                 |  |      |  |                |  |      |  |

|             |                |  |   |            |             |
|-------------|----------------|--|---|------------|-------------|
| <b>X056</b> | Great White F1 | Jon Snow   | Near white flowers? This breeding line is based on pale yellows, and throwbacks do occur.<br><br> | 6 leaf     | <b>\$55</b> |
| <b>X060</b> | Bella Gold     | Bella Majestic   | Looking for compact yellows (Grp. 1) with large flowers, possibly multi-tepal.<br><br>            | 5 - 6 leaf | <b>\$35</b> |
| <b>X065</b> | VICO Yellow    | Longwood Debutante seedling<br><br><i>I do not have a photo of this flower. If not actually green, it has at least 50% green genes</i> |    | 6 - 8 leaf | <b>\$60</b> |

*This price list will be revised from time to time. Please check back on occasion.*

*In case I am sold out of a given size, please indicate whether you might accept 1 size up or down at the price of the size actually supplied.*
