H Y B	I could not locate any photos of this new Grex	H.01	Paph Helen's Cutie (Little Davey x Wössner Helene), making this a mini complex. The primary genetic contributions are: charlesworthii 31.3%, helenae 31.3%, henryanum 12.5% & insigne 9.4%. Young seedlings, approx. 4" leaf span.	\$36.00
R		H.02	Paph. Little Trouble (barbigerum x charlesworthii), this primary hybrid is a tiny plant (4-5" leaf span). It was made with album forms, but	
D S	M. S		since these species carry the mutation on different genes, these plants have colored flowers. They carry the recessive genes, so they could breed albums in the next generation.	\$30.00
		H.03	Paph QF Ha'aheo	
	I have not been able to find any photos of this newer hybrid		(barbatum x leucochilum), this primary hybrid can produce some stunning flowers, photo shown is from a plant of this population. NBS/BS seedlings	
	newer nybrid			\$35.00
		H.04	Paph. QF Tiger Apple	
	Copy righted photos can be found on the		(appletonianum x tigrinum), primary hybrids with Paph. Tigrinum are rare. These seedlings are about 1 year from BS	
	internet			\$52.00
		H.05	Paph QF Wild Man	
	I have not been able to find any photos of this newer hybrid		([bellatulum x hangianum] x malipoense), this is a very interesting combination. Good size seedlings, but probably still about 2 years to BS (both hangianum & malipoense grow fairly large)	
				\$55.00
		H.06	Paph Snow Squall	
			(<i>Greyi x delenatii</i>), this combination can produce flowers that are either all white, or with some stippling.	
				\$55.00
		H.07	Paph. Spicero-Niveum	
	I have not been able to find any photos of this 130		(<i>niveum</i> x <i>spicerianum</i>), this primary hybrid was registered in 1893, yet I can find no photos anywhere. Seedlings are smallish in 2" pots, 1-2 years to BS	
	year old hybrid			\$35.00

H Y B	H.08	Paph. Vexillarium (barbatum x fairrieanum), this population has produced consistently very good quality flowers (photo = 83 pt AM/AOS). Plants stay compact and grow fast; seedlings are NBS/BS	
			\$35.00
R	H.09	Paph. White Madonna (niveum x acmodontum), another combination that can produce some absolutely stunners.	
D			\$35.00
S		3½" pot	\$48.00

	M.01	Donk Angeline Kriiger	
M	IVI.O I	Paph. Angelina Krüger	
U		(sanderianum x haynaldianum), this is a spectacular flower, and a very rare	
		find Single growth	\$120
	CIVIN	BS (1½ growth)	\$150
T	M.02	Paph. lantha Stage	
I		(rothschildianum x sukhakulii), this multifloral (usually 2 flowers) will start blooming from a single mature growth. BS seedlings	
F			\$65
	M.03	Paph. Julius	
L		(lowii x rothschildianum), a remake of the classic from	
0		1914. These are large seedlings, about 1 year to BS	
R			\$110
A	M.04	Paph. Lady Isabel (aka Lady Isobel)	
L		(<i>rothschildianum</i> x <i>stonei</i>), another classic multi-floral, first registered in 1897	
S			
			\$95
	M.05	Paph. Memoria Albert Eickhoff	
		(kolopakingii x stonei), these are large plants, but with a potential for a high flower count. Single growth, BS	
			\$135

M U L	M.06	Paph. QF Yellow Bird (Toni Semple x lowii, fma. album), these are BS plants in 4" pots, most have 1.1/2 growths. I have one with bud, it looks like it is producing 5 or 6 flowers.	\$85
T	M.07	Paph. Rolfei (bellatulum x rothschildianum), when produced with wild collected roths, these were impossible to bloom. Now that line bred roths are used, they will bloom	
F			\$95
L O R	M.08	Paph. Toni Semple (haynaldianum x lowii), a moderately sized plant; BS in 4" pots	¢95
	M OO	David William Winters Office	\$85
A L S	M.09	Paph. Wössner Vietnam Star (rothschildianum x vietnamense), some of these have budded up as single growth plants, compact for a multi-floral BS	\$75 \$85
		in Bud	\$85
	M.10	unnamed Grex	
		(Greyi x kolopakingii), the brachy parent helps keep the plant size moderate. BS, most plants are multi-growth	\$68

P H	P.01	Phragmipedium Faust's Panache (Sorcerer's Apprentice x exstaminodium), this is a 'different' long-petalled hybrid. Plants are NBS/BS	
R			\$66
A G S	P.02	Phragmipedium Mont Fallu (Iongifolium, var. roezlii x Grande 'PR'), this is one of the true long-petalled hybrids. I have 3 plants available, and all are in bud	
			\$68
